

EE379K Enterprise Network Security Lab 1

Report

Student: Sean Wang, szw87
Professor: Mohit Tiwari, Antonio Espinoza
Department of Electrical & Computer Engineering
The University of Texas at Austin

September 5, 2019

Part 1:

Step 1:

To build the server, compile it with: `gcc -o server server.c`.

Similarly for the client, compile it with: `gcc -o client client.c`.

To run them, simply execute either `./server` or `./client`.
